H. F. COPELAND, Sacramento Junior College, Sacramento, California.
A. W. HAUPT, University of California, Los Angeles.

Secretary, Editorial Board

ETHEL CRUM, Department of Botany, University of California, Berkeley.

Business Manager

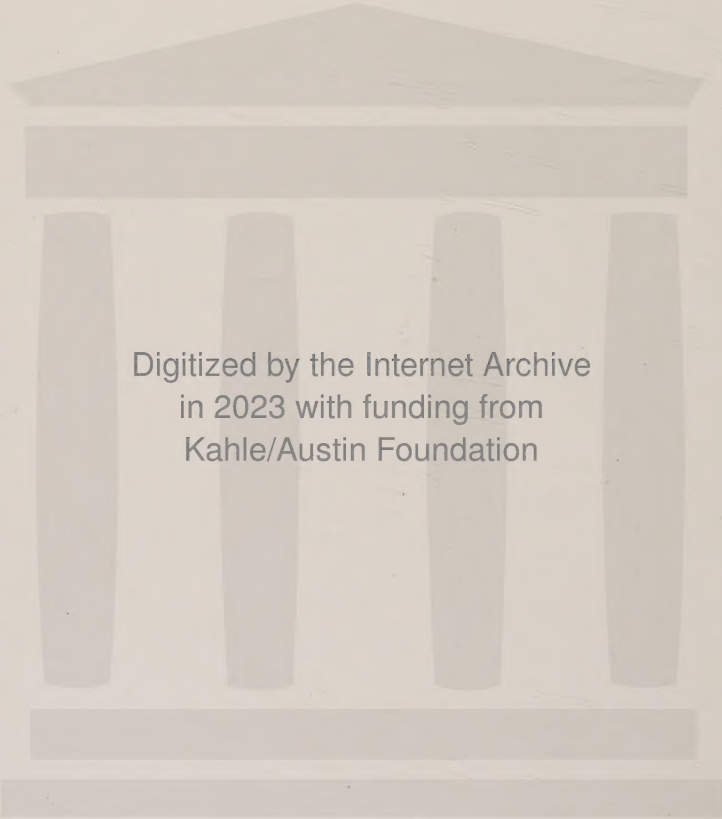

DAVID D. KECK, Carnegie Institution of Washington, Stanford University,
California.

To Louis Forniquet Henderson, who celebrated his eighty-seventh birthday on September 17, 1940, this, the fifth, volume of *Madroño* is respectfully dedicated.

He is the only living representative of that small coterie of western botanists who contributed so largely to the work of Asa Gray and Sereno Watson. He enjoyed the close friendship of Joseph and Thomas Howell, Martin W. Gorman, and Charles V. Piper. His many reminiscences of his botanical associates of another day are a delight to younger ears.

His botanical explorations embrace a large portion of the states of Idaho, Washington, and Oregon. He was the first American to collect in the Olympic Mountains of Washington, and his various trips into the Salmon River country of Idaho opened up a region hitherto entirely unknown. In his honor, a host of species has been named, of which the following is only a partial list: *Allium Hendersoni* Rob. & Seat., *Allocarya Hendersoni* A. Nels., *Amsinckia Hendersoni* Suksd., *Angelica Hendersoni* C. & R., *Aster Hendersonii* Fernald, *Astragalus Hendersoni* Wats., *Brodiaea Hendersoni* Wats., *Carex Hendersoni* Bailey, *Dodecatheon Hendersoni* Gray, *Eriogynia Hendersoni* Canby, *Erythronium Hendersoni* Wats., *Lappula Hendersoni* Piper, and *Lomatium Hendersoni* C. & R.

His long and fruitful career and his fine personal qualities may well serve as a model to younger generations of botanists. We wish him continued good health, and the enjoyment of many more such anniversaries.
